

NOTE:

A limousine vehicle is required to meet, amongst other things, the following definition:
*be **evidently** suited by reason of its style and condition for the provision of hire services for ceremonial occasions, or for corporate or other prestige purposes, and be a vehicle of such make and model as the Authority may from time to time specify or such equivalent make and model as the Authority may approve.*
 (Schedule 5; Taxi Regulation (Small Public Service Vehicle) Regulations 2015, S.I. 33 of 2015)

All vehicles are required to pass an individual vehicle assessment, the Initial Suitability Inspection, prior to being licensed. Previous licensing of the same vehicle does not guarantee a "Pass".
 The list below is intended as guidance in relation to popular mass produced passenger vehicles.
 Other vehicles include historic (vintage) vehicles, classic styled "replicas" and stretched vehicles.

Maximum gross vehicle weight for all vehicles is 3,500kg.

All vehicles require four wheels.

In considering the characteristics of a vehicle the Authority is considering prestige and reputation as well as physical vehicle attributes such as **specifications, quality and age**.

Please contact the Authority prior to any purchase in relation to a vehicle not listed as acceptable for consideration: the acceptance of a vehicle is at the sole discretion of the Authority.

This guidance note does not purport to be either legal or exhaustive.

Considered Acceptable	Considered Unacceptable
