SPSV ONLINE SERVICES DRIVER LINK NOTIFICATIONS

SPSV Industry App

Driver Check App

The Authority maintains an electronic database of links between each licensed SPSV and its current licensed driver. It is the driver's legal responsibility to ensure that this information is constantly up to date. The driver does this by informing the Authority whenever they start driving a different vehicle. This information feeds to the **Driver Check App** used by the public to ensure that the vehicle and driver they intend to use are licensed and registered with the Authority.

SPSV Online Services is a new web-based service that provides a simpler and better way to link yourself to a vehicle and now to view your history, with intuitive screens and a full history of all links created, changed or broken. Notifications of link changes will be sent to both affected drivers and vehicle licence holders. Another new feature will allow you to view and print copies of your notifications directly from the web.

Current users: Download the software update when requested. Driver links will now be responsive to licensing changes, for example, you will need to create a new link if you change the vehicle on your licence or if your driver licence expires. You use the same email address and password at log in - just add your driver licence number.
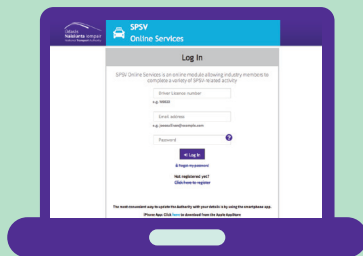

New Users: Call 0761 064 000 or email **taxis@ nationaltransport.ie** to receive your NTA Account Registration Number and be talked through the process.

## 4 ways to comply with this legal requirement
