How do I calculate the applicable Fee Band?

The Fee Band applicable to any application is based upon the number of services provided each year. The number of services per year will be calculated as follows:

- an outbound service is 1 service; an outbound and return service is 2 services (1 vehicle maximum being used to provide the service)
 - where a service operates a part of the overall route, or an express version of the route, these will be counted as one service.
- where the service has licensed augmenting services (i.e. is licensed to operate with 2 or more vehicles), the augmenting services will be counted as 0.5 of a service (to allow for the fact that they may not operate).
- where a service operates for the college term only, then the service will be calculated as operating for 35 weeks of the year, to allow for college holidays, breaks, lower frequency required for exams, etc.
