   It is agreed and acknowledged that, without prejudice to the right of the Authority to regard any particular circumstance as being within the Operator's control, the following reasons may give rise to Lost Service Kilometres are within the Operator's control:

   \[
   \text{Lost Kilometre Deduction Rate} = \left( \frac{\text{Annual Operating Charge}}{\text{Annual Scheduled Kilometres}} \right)
   \]

6. The Lost Kilometre Deduction to be applied in determining the Basic Amount for a Relevant Period in respect of Lost Service Kilometres (other than those which fail under paragraph 3) shall be the product of the number of Lost Service Kilometres in such Relevant Period and the Lost Kilometre Deduction Rate calculated in accordance with paragraph 4.

7. The Authority will notify the Operator of the amount of the Lost Kilometre Deduction to be applied to the Fee in respect of a Relevant Period, as determined in accordance with this Schedule 2, Part B.
Schedule 2

Part C - Indexation

\( A_0 \) = the value of the Annual Operating Charge in Schedule 2 Part A;

\( I \) = the value of the Consumer Price Index (Base December 2016 = 100) for the November preceding the Review Date;

<td>The Punctuality Service Credit shall be formally suspended until the date of the first quarter which begins at least 8 weeks after the date of commencement of services. This time during which the Service Credit is suspended shall be known as the Suspension Period. During the Suspension Period, the operator will be required to record and report punctuality as detailed below however no Service Credit deductions will be applied i.e. full Service Credits (4 Credits) will be awarded regardless of the percentage of services which are reported as operating “on time” as defined below. The operator will be afforded an opportunity to propose a revised timetable before the end of the Suspension Period, for the approval of the Authority. The Authority may, at its absolute discretion, accept or reject the proposed change. Following the conclusion of the Suspension Period, the Punctuality Service Credit shall be implemented immediately and in full as outlined below, for the remainder of the contract.</td>

Each Service will have two (2) Timing Points on the Trip:

- Timing Point 1 will be at departure from the first Stopping Point on the Trip
- Timing Point 2 will be at arrival at the last Stopping Point on the Trip.

The percentage of buses operating "on-time" shall be calculated by comparing the actual observed departure/arrival times at the relevant Timing Points with the specified departure/arrival times set out in the Working Timetable.

- A bus will be regarded as “on time” at Timing Point 1 on the Trip if it departs from the first Stopping Point on the Trip not more than one minute early or not more than five minutes 59 seconds late against the Working Timetable.
- A bus will be regarded as “on time” at the last Stopping Point on the Trip (Timing Point 2) if it arrives at a specified timing point not more than one minute early or not more than five minutes 59 seconds late against the Working Timetable.
Departures:
A maximum percentage of 2% of departures at Timing Point 1 (First Stopping Point) shall be permitted to fail the requirement to operate “on time” (as defined above) without the operator being subject to a deduction, in any one Reporting Period.

Thereafter, for each full 2% of services failing to operate “on time” in that Reporting Period, 0.5 service credits shall be deducted, up to a maximum deduction of 2 service credits where less than 91% of departures at Timing Point 1 (First Stopping Point) operated “on time”. Arrivals:
A maximum percentage of 20% of arrivals at Timing Point 2 (last Stopping Point) shall be permitted to fail the requirement to operate “on time” (as defined above) without the operator being subject to a deduction, in any one Reporting Period.

Thereafter, for each full 2% of services failing to operate “on time” in that Reporting Period, 0.5 service credits shall be deducted, up to a maximum deduction of 2 service credits where less than 74% of arrivals Timing Point 2 (Last Stopping Point) operated “on time”. The Authority may vary the methodology for monitoring punctuality performance or the Performance Standard to be applied at any time during the Contract Period.

Where a Service Interruption associated with a Public Event or an exceptional event of significant duration, which is outside the control of the Operator, occurs in the previous Reporting Period and has demonstrable Network wide effects on Service punctuality, the Operator may submit supplemental information to the Authority in
relation to the event, including location time and duration of Service disruption due to the event. The Authority shall consider such supplemental information and may exempt the Services affected from Punctuality Performance calculations.

1.5 The Operator shall familiarise themselves with the contents of the ‘TTS Requirements’ document in relation to the operation of the Leap Card Scheme.

The Operator shall ensure that the latest configuration data is successfully implemented on the Ticketing Equipment on each Bus in advance of commencement of services each Operational Day. It is recommended that drivers power on the machines at least 10 minutes prior to the start of service in order to allow any pending downloads to take place.

2. Leap Card Transactions

2.1 A Leap Card travel credit facility is available on certain Leap card types. Customers can present a Leap Card to the ETM; advise the driver of their destination or the fare they wish to pay and the driver shall select the relevant fare/destination option to deduct the correct travel credit fare from the card.

2.2 The Operator shall ensure that its staff are aware of, and facilitate the following:

(a) certain Leap Card types do not have the travel credit facility (for example, Leap Family pass) and instead contain ticket products that can be validated at the ETM. In such cases the travel credit facility may be reported as being blocked but may still contain a valid ticket product and the driver shall validate such products rather than attempting to deduct a fare from the travel credit balance;

(b) Leap Cards that have the travel credit facility contain a deposit that can be used to pay for a fare, even if that fare exceeds the available travel credit on the Leap Card, provided that the Leap Card has a minimum positive balance of €0.01 and provided that the fare payable does not exceed €5.00;

(f) customers may present a personalised Leap Card with a pre-loaded period pass to the ETM.

2.3 In the event of error by the customer or by the driver in the usage of a Leap Card, the driver shall reverse the transaction as necessary.

2.5 Leap Cards shall not have travel credit value or ticket products added to them on board the Bus.

2.6 Customers with any complaints or having difficulties with their Leap Cards shall be advised to contact the Leap Card call centre; the telephone number of which is on the back of all Leap Cards.

2.7 Drivers shall, if appropriate (i.e. not when driving or if there are long queues) provide customers on request with a Leap Card status report from the ETM (including a printed paper note which displays the remaining value, products and most recent five journeys). Such notes are not valid for travel.

4.4 The Operator shall cooperate in carrying out any survey of passengers required by the Authority, the Department of Social Protection or any other body with responsibility for travel concession schemes, in relation to the use of a travel concession scheme.

5. Passenger cannot pay
A passenger who cannot pay shall be refused travel unless he/she is a vulnerable person or in distress as a result of something happening to them, in which case he/she shall be allowed to travel provided the driver records the passenger journey in accordance with instructions issued with the Authority from time to time.

6. Tickets Issued in Error

6.1 In the event of a cash ticket being issued in error the driver shall withdraw the ticket, and where appropriate, issue the correct ticket to the passenger and make any necessary cash adjustment.

6.2 The withdrawn ticket shall be handed in at the driver's garage at the end of his/her duty together with an explanation as to the circumstances and shall be retained by the Operator.

6.3 In the event that a driver fails to hand in the withdrawn ticket, the value of the ticket issued in error shall be payable by the Operator to the Authority, as if the ticket had not been issued in error.

7. Re-Issued Tickets:

Under no circumstances may used or withdrawn tickets be re-issued. Drivers must not have used tickets (except withdrawn tickets) in their possession at any time.

8. Refunds

8.1 In the event that a customer purchases a ticket, and is then unable to make their journey due to a disruption to the Service, the Operator shall refund the cost of the journey on request, provided the customer provides satisfactory evidence that they were unable to complete their journey by an alternative public transport operator due to the disruption without incurring additional ticket purchase costs.

8.2 Refunds shall not be issued by the driver.

8.3 The Operator shall maintain records of the amount and reason for each refund, and shall make such records available to the Authority on request.

9. Information and Data from the Ticketing Equipment

The Operator shall be responsible for the downloading of transaction data from the ETM, and for the recording and storage of the ticketing transaction data in order to prepare the Relevant Period Reports.

10. Calculation of Fares Revenue to be Lodged in the Specified Account

10.1 The Fares Revenue due to the Authority shall be:

(a) the amount of revenue receipts identified by the data provided by the ETM, (or, in the absence of any or all of this data, the amount of revenue receipts accruing to the Services as can be identified or supported by such other information and documentation as the Authority may reasonably require);

(b) less any adjustments due in respect of tickets issued in error for which the withdrawn ticket has been retained and a satisfactory explanation provided;
plus any adjustments due in respect of revenue due as a result of unsupported tickets issued in error for which the withdrawn ticket has not been retained.

10.2 In the event that the Operator is found to have failed to make the appropriate adjustments in any Relevant Period, the Authority shall be entitled to claim payment for all unsupported ticket annulments in the Relevant Period in question.

10.3 For the avoidance of doubt, the Operator shall be responsible for any mistakes, errors, invalid or ineligible claims by its drivers, operators or other staff which lead to invalid adjustments.

10.4 The Operator shall, in the Relevant Period Report, submit an analysis of any discrepancies between ETM transaction data (or other information or documentation used) and the amount paid into the Specified Account for agreement with the Authority, including an explanation as to tickets issued in error and which shall be subject to the approval of the Authority.

10.5 The Operator shall be responsible for any discrepancies or errors which result in a loss of Fares Revenue to the Authority including those caused by the malfunction of the ETM, the use of illegal tender, any illegal tampering, theft and other cash losses, and shall indemnify the Authority against such lost patronage revenue. Any over-collection of revenue by the Operator shall be the property of the Authority.

11. Misallocation of Fares Revenue

11.1 The Authority may conduct an audit or inspection or investigation of the Operator's revenue collection arrangements at any time during the contract.

11.2 The Operator shall co-operate fully with any investigation carried out by the Authority, and shall make all necessary records, documents and information available.

11.3 If it is discovered, or the Authority has reasonable grounds to believe, that any Fares Revenue which should have been paid to the Authority in respect of the Services together with all supporting documentation or information which would have identified the Fares Revenue as received or collected in respect of the Services has not been paid or provided to the Authority, then the Operator shall:

(a) pay forthwith to the Authority all Fares Revenue which should have been handed over in respect of the Services together with interest on the total amount of such delayed payment at the rate of 3% above the then current base rate of the European Central Bank from the date when payment should have been made in to the date when payment is received by the Authority;

(b) indemnify the Authority in respect of all costs and expenses incurred by the Authority in checking all such previous payments, returns and information as the Authority in its absolute discretion considers necessary to ensure all Fares Revenue attributable to the Services has been paid over to the Authority; and

(c) pay forthwith to the Authority all Fares Revenue which is identified by the Authority as a result of any investigation as being attributable to the Services and which has not previously been paid over to the Authority, together with interest on all such sums for the period and at the rate set out in paragraph (a) above.

11.4 For such period as the Authority is conducting any investigation and until all sums shown to be properly attributable to the Services have been paid to the Authority, the Authority may withhold the Basic Amount for each Relevant Period in an amount equal to any shortfall not otherwise discharged by the Operator. All such sums withheld shall be paid by the
Authority to the Operator following the receipt by the Authority of all sums due under paragraph 11.1, 11.2 and 11.3 above.

5. Monitoring

5.1 The Authority will collate feedback on the RTPI system based on the public feedback from on the www.transportireland.ie website and independent surveys, and will send this information to the operator on a regular basis. Where the Authority believes that any deficiencies reported are or may be within the remit of the Operator to resolve (e.g. defective on bus AVL equipment and related elements such as odometers, open / close door contacts and inaccurate or missing data supply to buses) the operator should respond to the Authority within 7 Business Days, categorising any issues identified, proposed remedies and solution implementation timeline.

5.2 The Operator will at all times endeavour to minimise the effect of equipment failures on the timeliness and accuracy of RTPI data for the equipment in its remit by implementing a suitable repair regime that can rapidly identify and correct common failures. This can include (but is not limited to) defective on bus AVL equipment and related elements such as odometers, open / close door contacts and inaccurate or missing data supply to buses. The Operator will provide reports on such failures and the remedial action taken as part of its Quarterly Service Quality Performance Report to the Authority.

5.3 The Authority (acting reasonably) may require additional data on any of the above at any time with a view to improving the RTPI service.
