The Judging Panel

Caroline Butler

Director at Clifton Scannell Emerson Associates
Consulting Engineers

Caroline Butler is a Director with Clifton Scannell Emerson Associates Consulting Engineers and an engineering graduate from University College Dublin. She is responsible for the project management and design of complex infrastructure projects in environments from busy urban settings to suburban and rural.

Caroline has extensive experience of taking projects through all stages of delivery from concept and optioneering, through design, planning, construction and handover. She also has extensive experience of coordinating and managing diverse teams including architects, engineers, technicians and environmental consultants. Much of her work has focused on sustainable infrastructure and providing for active travel, such as bus priority projects, junction upgrades to provide for active modes, cycling schemes and greenways.
