OBSERVATIONS

Problem:

Insufficient storage bike on campus

Insecure storage on campus

Our Goal:

Focus on making bike storage a more accommodating, safe and practical experience for students.

Shower and laundry facilities for those who commute for long distances and/or in harsh conditions. Changing rooms with lockers.

Lounge area for commuters to relax after long journeys. A place to wait in between lectures. Kitchen facilities available for commuters to prepare food.

On-Campus bike repair shop selling bike parts, safety equipment and helmets. Bike equipment vending machines with tire tubes, locks, water bottles and similar items.

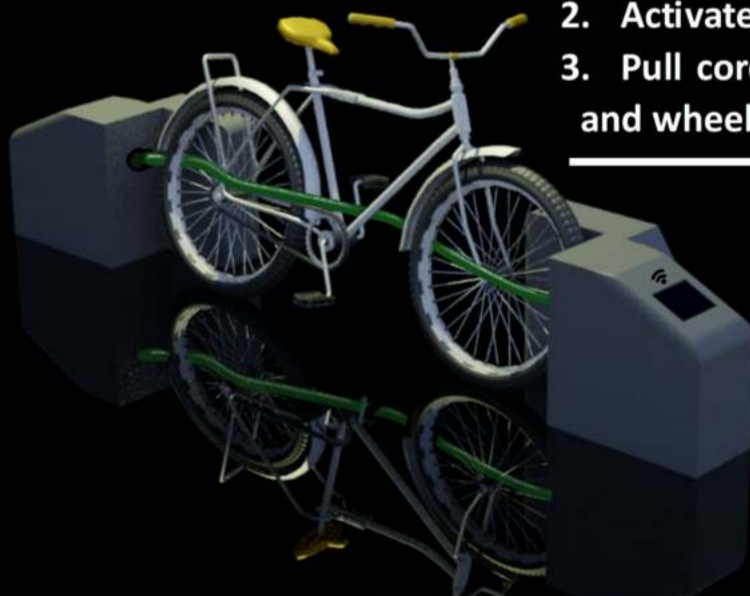

Mantis bike repair stations outside for students to conduct minor repairs

BELOW GROUND STORAGE

The "SHIM-E LOCK" is an effective, secure and convenient on-campus bike lock. It can be used in 3 easy to follow steps:

1. Place bike into the dock.
2. Activate with student card
3. Pull cord through bike frame and wheels

FULL SECURITY

"SHIM-E LOCK" is paired to your student card and yours only until you collect your bike.
