

eSPSV 2025 Grant Scheme Eligible Vehicles

The information contained in this guide is intended to assist SPSV vehicle licence applicants in complying with licensing conditions. This listing does not apply to local area hackney vehicles. Care should be taken to understand which model version is being considered. All vehicles (at Change of Vehicle) for taxi and hackney licensing are required to have clear windows: most privacy glass does not meet this condition. Vehicles which are "modified" as regards seating require a Technical Assessor's Full Report with supporting test proof. This is a constantly evolving dataset and NTA is not responsible for any loss or damage howsoever arising because of sole reliance on the information therein. All vehicles are still required to pass the relevant suitability inspection prior to being granted an SPSV licence. Some manufacturers offer reduced warranty terms where a battery electric vehicle is used as an SPSV. Please ensure you are satisfied with the warranty terms and conditions of your proposed vehicle prior to purchase. The distance a battery electric vehicle can travel in a single charge, often referred to as 'the range' will depend on multiple factors including driving behaviour, prevailing weather conditions, weight of the vehicle, tyre pressure etc. Please check with the vehicle manufacturer for information on vehicle range. Where a vehicle model you are interested in does not appear on this list, please contact us on 0818 064 000 to request a measurement.

Taxi/Hackney

Electric (BEV) Model

Audi Q4 e-tron

BYD ATTO 3

BYD SEAL

BYD SEALION 7
