James Glenn-Craigie

Transport Engineer at Arup

James Glenn-Craigie graduated with a Master's degree in Civil, Structural and Environmental Engineering from Trinity College Dublin in 2017, specialising in Transportation. He is a Traffic and Transportation Engineer with over seven years of experience working across Ireland and Australia.

James joined Arup in Dublin in 2019, where he worked within the Transport Planning team on a wide range of projects, including development-related transport assessments, mobility management plans, and transport strategies for public- and private-sector clients. In 2022, he relocated to Sydney with Arup, gaining further international experience across transport engineering, strategic development, active travel planning and multi-modal analysis. He returned to Dublin in mid-2025, continuing to support large-scale strategic projects and development planning work.

Throughout his career, James has developed strong expertise in sustainable transport, active travel, and the role of walking, cycling and public transport in shaping how people move. He is particularly interested in how transport systems can encourage behaviour change, support healthier travel choices and improve the quality of urban life. His work reflects a passion for designing places that function well, reduce reliance on private cars, and create more accessible, people-focused environments..
